#### WINE STORY

Montebello is a modern study on classic Chianti. High proportions of Sangiovese are standard today, but traditionally Chianti was made from field blends that included up to 100 different varieties. An homage to that older tradition and rather than focusing on Sangiovese (or international varieties), the winery uses an assemblage of nine of Chianti's most important indigenous red varieties in equal parts for Montebello. Each variety is fermented and aged individually and then blended after a year of barrel aging. Montebello is a unique and complex antithesis to the contemporary single-variety obsession.
